

Social Facilitation for the Enkanini Informal Settlement

Client

Stellenbosch Municipality

Objective

Introduce the project to community members. The project is aimed at providing geotechnical, environmental impact assessment and town planning services (including roads, electricity, water and sanitation). It also aims to highlight developable and non-developable areas of the proposed site. Detail the idea and get buy-in from the stakeholders as well as general buy-in.

Tactics

- Establish the Steering Committee from members of the community
- Organise induction meeting for the Steering Committee
- Hold Public meetings to introduce and keep the community informed.

Outcomes

The community participated in the project and all applications were submitted and approved.
