

INFRASTRUCTURE DEVELOPMENT IN KHAYELITSHA

Client

University of Stellenbosch Business School (Small Business Academy)

Objective

The study was an input into the Small Business Academy Project on small business development in Khayelitsha. It also investigated major infrastructural developments and investments in Khayelitsha over the past 10 to 15 years.

Tactics Employed

- Desktop research was conducted to establish major infrastructural projects in Khayelitsha and the various investments made over the past 10 – 15 years.
- Observations were made at different business sites in Khayelitsha.

Outcome

- The benefits experienced by the Khayelitsha Community through infrastructural business development projects were identified.
- Critical backlogs, corporate sector efforts to address infrastructural bottlenecks as well as future infrastructural projects were identified
- Most infrastructural development took place in Harare, Khayelitsha CBD, Kuyasa, and Site C (Spine Road).
